### TRANEXAMIC ACID

#### Enlightening Solution

Helps to reduce and prevent the appearance of hyperpigmentation and improves the appearance of both resistant dark spots and translucent reddish spots caused by surface blood vessels.

### DEXPANTHENOL

#### Nutritive Solution

Supports acne treatment by maintaining skin hydration, enhancing the skin barrier, reducing inflammation, and promoting healing and regeneration of the skin.

### GLYCOLIC ACID

#### Brightening Solution

Treats acne by exfoliating the skin, removing dead skin cells, and preventing clogged pores. It reduces inflammation and promotes cell turnover, improving skin texture and minimizing acne lesions. Additionally, it fades post-acne dark spots by accelerating the removal of pigmented cells and promoting even skin tone.

## ACNE TREATMENT

**Patient Age/Gender:** 25 / woman

**Product indication:** Tranexamic Acid + Dexpantenol + Glycolic Acid - 1 session

**ANDREA

### **L-Carnitine**

#### **Lipolytic Solution**

Is responsible for metabolizing fat. After breaking down the stored fat, it mobilizes the fatty acids into the bloodstream, attaching itself to them and carrying them to the area of the cell that converts fat to energy.

### **Caffeine**

#### **Lipolytic Solution**

Caffeine Lipolytic Solution works to increase blood flow and stimulate adipocytes to release fat into the bloodstream, so that it can be burned by the body's metabolism. In simple terms, caffeine drains the body's fat cells.

## **LOCALIZED FAT**

**Patient Age/Gender:** 37 / woman
