Luxura
by Hapro

I like!

we like X₁₀ ...

we like luxury

Luxura X₁₀ clearly is the most sophisticated product within the Luxura 'X-range' of sunbeds. Its combination of cool design and powerful efficiency offers an extraordinary tanning experience. Luxura X₁₀ gives an irresistible appeal.

X₁₀ not only looks great with its beautiful design. The spacious tunnel also offers that extra bit of comfort. While tanning with the closed canopy, the sunbather has lots of space to feel comfortable and free.

contour
PLUS

- ContourPlus, the ergonomically shaped reclining acrylic surface, makes lying down as comfortable as can be.

XL
LIGHT

- The clear operating display offers the tanner control of the tanning session. It is positioned centrally in the canopy for easy access.
- When it comes to body cooling, Luxura X₁₀ offers even more. Various openings throughout the length of the canopy provide a comfortable body cooling for the perfect climate.

AirCo

- AirCo, the Luxura air conditioning system. Ensures a pleasant temperature, adjustable at different levels.
- Smart cooling - a unique cooling system that reacts intelligently and efficiently to the temperature of the sunbed. It starts the session very quietly and the ideal feel-good temperature is soon reached in the sunbed. Tubes reach optimal operation temperature faster - for the best tanning results and tube efficiency.

we like it colourful

The X₁₀ features Ambient FlowLight with 15 flow programmes for beautiful colour effects or 30 constant colours to change just as you like. It gives the sophisticated design an irresistible appeal. A real eye-catcher.

**we like the perfect
admoresphere**

we like choices

With X₁₀ you can make your choice, many choices in fact. Face tanners and filters turn X₁₀ into your individual sunbed.

SLi

- High pressure face tanner with halogen lamps placed behind a filter
- High pressure lamp is positioned horizontally with smart parabolic reflector
- 520 W in X₁₀ only

SLi + (optional)

- High pressure face tanner with halogen lamps placed behind a filter
- High pressure lamp is vertically positioned in a premium quality reflector housing with a stunning visual diamond reflection for optimum output
- Switchable wattage on SLi and SLi+ for variable strength

The Luxura SLi technology offers several choices: learn about the special qualities and select the optimum filter that suits the studio strategy and will meet the expectations of the clients.

SPS: Standard Power System

- This powerful face tanner gives extra attention to the face. The dark blue filter glass allows effective UVA output for direct pigmentation

BPS: Balanced Power System

- The combination of the lamps and the mirror filter glass is especially developed to get a perfect balance of UVA and UVB up to the optimum allowed by the EU norm of the 0,3 W/m² and UV-type III. For skin stimulation and a nice warm effect, the BPS also puts some infrared through.

HPS: High Power System

- Intense tanning performance is guaranteed by the HPS filter. This created the most effective combination of UVA - UVB and infrared. The strong combination creates a perfect deep tan with immediate results.

we like it refreshing and entertaining

With Qsens, a cool mist is sprayed all over the user's body during the tanning session. Tanners choose to enjoy the fixed intervals or manually activate the cool mist for refreshment. X₁₀ has two nozzles, perfectly placed to cool off the sunbather's body and enhance his overall feeling of well-being. That's more than refreshing.

With Xsens I you can select one out of three fragrances (Ocean, Blossom or Sandelwood). The Xsens III offers all three fragrances and leaves the choice to the tanner, who can select and switch while tanning.

SoundAround Plus with four external channels that can be set according to the owner's preferences. It comes with MP3, SmartVoice, four loudspeakers and subwoofer for an amazing sound. This feature also includes SD cards providing two extra internal music channels (relax music, energetic music or program your own music).

With SmartVoice, the sunbather is guided through the various functions by a pleasant female voice - SmartVoice is available in many different languages.

Thanks to the Luxura Bluetooth system sun worshippers can wirelessly stream their own music during the tanning session. A connection can easily be established from a smartphone or tablet to the sunbed's Bluetooth receiver. A unique aspect of this system is that it lets you, the operator, set each booth or sunbed's number and the access code so the user can quickly and easily connect to the right one. Also handy: while streaming the tanning patron can receive incoming calls as usual. When a call is received the music is muted and the conversation takes place privately, via the mobile phone. At the end of the session the Bluetooth connection is automatically ended.

CHIP Tuning

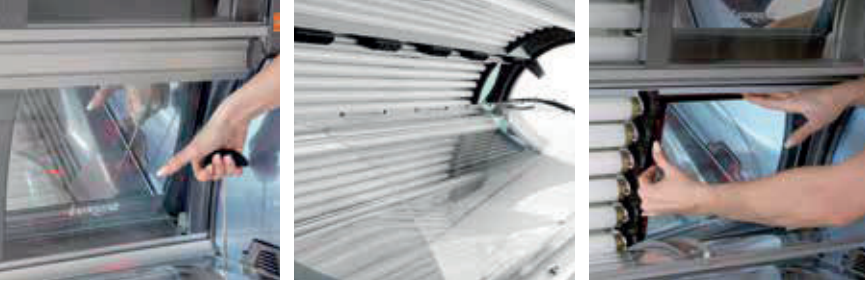

Intelligent controls result in greater energy efficiency

The unique IP control is the Intelligent Power System, a highly sophisticated technique which dynamically controls the electronic ballasts for greater energy efficiency.

This intelligent supplementary module controls the power supply for the tubes and keeps the degree of impact during the lifespan of the lamps consistently optimal at the EU recommended level of 0,3 Watt/per m², and for UV-type III. If national regulations authorize, the tubes can be programmed on a higher level of output as well.

The IP Control can reduce the energy output of the tubes by 25%, and moreover increase their lifespan up to 1,500 hours. Result: lower operational costs.

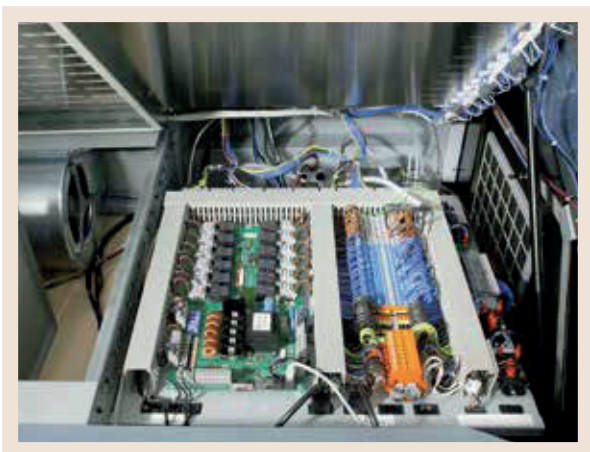

we like it easy!

Quick release hinge system bench

Just lift up the bench and the staff or technician will gain easy access to all parts that need to be reached for maintenance. This way you can replace Xsens cart-ridges, clean and refill the Qsens resevoir and empty the airco reservoir in no time.

The acrylics in the bench and canopy can be opened easily by the quick release system. It makes cleaning and maintenance of acrylic sheets and tubes very easy. It can be done by the staff in a safe and fast way.

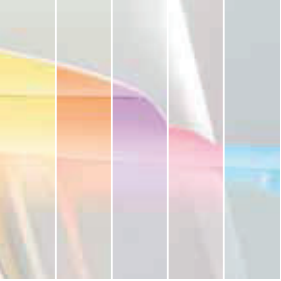

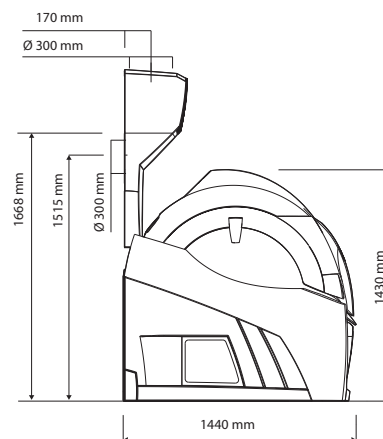

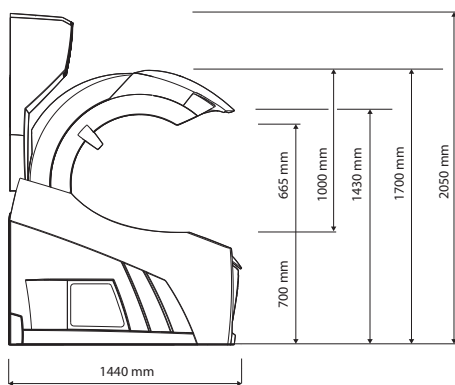

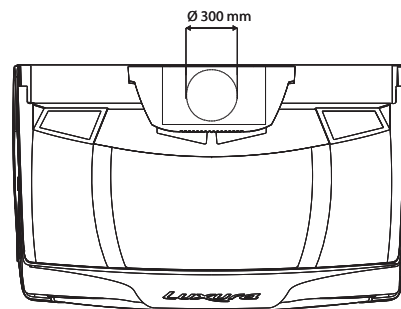

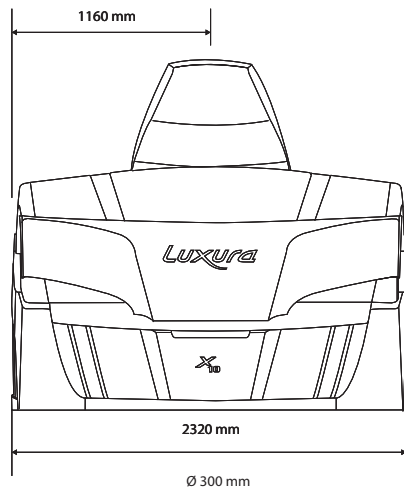

X₁₀ with air exhaust tower including warm air return system (WRS)

- Three versions of air extraction are available. In the standard version, air is extracted from a central point at the back of the sunbed, where it is conveyed to the back or upwards. Version 2 is embellished by means of an attractive Air Tower. Version 3 offers the Air Tower with WRS which stands for warm air return system controlled by thermostat. Its status can be monitored at all times by means of the indicator mounted on the Air Tower.

SLi

SLi+

SPS

BPS/HPS

we like X7...

we like new technology

The stylish appearance of the X₇ is combined with absolute quality in technique. This reflects in a compact, yet very comfortable tanning area and great tanning results!

- The standard BPS filter glass for SLi gives a perfect balance of UVA and UVB up to the optimum allowed by the EU norm of the 0,3 W/m² and UV-type III. For extra stimulation of blood circulation, BPS also transmits some infrared. This will enhance the tanning effect, as well as the instant visual effect in the mirror.

Choose from a range of optional tanning features that clearly stand for high performance tanning.

- A choice of different versions from 38 or 42 tubes.
- SLi face tanner with halogen lamps placed behind a filter.
Available in 400 W, switchable
- SP_r "spaghetti" tubes strategically placed between the tubes for extra face and décolleté tanning at comfortable temperature. An optimal mix of UVA and UVB within the EU norm, switchable.
- HPS filters for SLi transmit a strong and powerful combination of UVA, UVB and infrared. This highly effective combination will give an instant visual tanning effect in the mirror.

X₇ SLi

Smart cooling

With Smart cooling, the tanning session starts very quietly as the cooling system reacts intelligently to the temperature of the sunbed. Tubes reach optimal operation temperature faster providing best tanning results and tube efficiency.

AirCo

As refreshing feature AirCo combines three ways to create the most comfortable temperature while tanning. Air-conditioned air is blown between the double acrylics in the bed to cool the lying area. Secondly this exclusive system blows the air-conditioned air via the body cooler at the foot end in a fresh breeze

over the body. A separate face cooler makes the cooling sensation complete. This fine AirCo feature delivers air-conditioned air to the face area. The directions of the face cooler can be adjusted easily. The body cooler and the face cooler can separately be adjusted in 8 power levels.

X₇ SPi

With optional IP Control the UV-output of the tubes is kept consistently optimal at the EU recommended level. This way, energy output of the tubes can be reduced by 25%, and more over increases the lifespan of the tubes up to 1500 hours. If national regulations authorize, the tubes can be programmed on a higher level of output as well, of 0,3 Watt/per m² and for UV-type III.

we like ambient

Ambient FlowLight underlines the stylish outline of the X₇. It's used in numerous decorative elements and gives the sophisticated sunbed an irresistible appeal. It allows to choose 15 flow programs for beautiful colour effects or choose one out of a selection of 30 constant colours.

- Ambient FlowLight to highlight Connect line, Centre line and Eyeliners
- 15 flow programmes
- 30 constant colour schemes to change as you wish

X₇

X₂

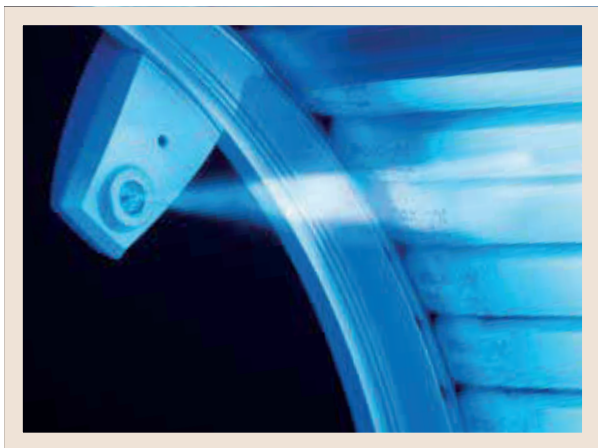

we like aroma

With Xsens III, three different fragrances can be put at the sunbather's disposal. The client chooses a scent at the start of the session and can switch while tanning.

Different delightful scents:

- Ocean
- Blossom
- Sandelwood

we like it cool

Qsens sprays a gentle mist to cool the tanner. This natural refreshment comes at intervals during the session and can be switched on or off by a simple touch on the display.

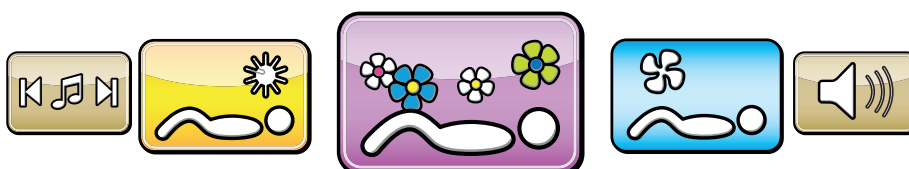

we like details

Discover the unique full colour display. It's eye-catching and makes you want to navigate through its options at once.

- Smooth, stylish design with truly intuitive handling
- Smart Touch menu with easily understandable icons
- Different tuneable features to choose from
- Within easy reach on the inside of the canopy
- Well-protected by acrylic sheet
- Very bright - display can be read easily, also with protective sunglasses on

we like entertainment

The high-quality sound system makes every tanning session in the Luxura X, a sensory delight for the ears. The Luxura offers a selection of four music channels that can be played through the four integrated loudspeakers and a subwoofer to bring the music to life. Listen to your own playlist, a selected radio station or relaxed Luxura background music – SoundAround Plus makes it all possible! In addition to four external channels, there are also two preprogrammed SD cards with relaxing and energising music. All the preprogrammed music is copyright free. As studio owner you can also put your own selection of music on the SD card. The user also has the option of easily plugging in their own MP3 player or smartphone. With the SmartVoice feature a friendly voice guides the sunbathing guest through the sunbed's various options and functions. My MP3 and SmartVoice are included in SoundAround Plus.

Moreover, as part of SoundAround Plus the Luxura Bluetooth system offers the possibility to stream music from a smartphone or tablet via a wireless connection. The owner can even assign the booth or sunbed a number and access code. The tanning patron can receive and answer incoming calls as usual while streaming. After the session the Bluetooth connection is ended automatically.

Air exhaust

Luxura X₇ comes standard with two air exhaust pipes. As an option it's possible to combine the two exhaust pipes into one by using the air exhaust T-joint. With the optional air exhaust jacketing, the pipes can be elegantly hidden from public view.

we like good service

Thanks to innovative technical solution details, any employee can carry out the necessary cleaning tasks and the easy maintenance:

- Both acrylic sheets from the bench and canopy can be opened literally single-handedly which makes cleaning the acrylic sheets and tubes very easy as well as changing tubes
- The liftable bench front gives the operator easy access to all parts that need to be reached for easy maintenance
- Easy changing of Xsens cartridges and Qsens jerrycan
- Easy emptying of airco reservoir
- Easy replacement of dust filters

THE NEW YORK TIMES

we like X₃...

we like a solid base

Luxura X₃ is how easiness is spelled: It is the strong all-round talent to enter the Luxura segment. X₃ displays a fresh, compact and up-to-date design that comes in different fashionable colours, so the operator can keep up with the latest trends:

- Pearl White
- Fuchsia Pink

Upgrade the Luxura X₃ with 'Connecting shield' to add more luxury to the sunbed. The optional 'Connecting shield plus' includes Ambient FlowLight, My MP3 and SoundBox to turn tanning into an exciting musical enjoyment.

All features that can be operated by the user, are fit into a clarifying display panel, which is easy to use.

X₃ Fuchsia Pink with Connecting Shield Plus

X₃

X₃ Fuchsia Pink with Connecting shield plus, SLi

Luxura X₃ comes standard with EcoPower, the electronic ballasts that not only allow the configuration of the tubes to be optimised but also generate energy savings of approximately 25%. Choose between 30 SLi, 30 SPi, 32 SLi, and 32 SLi Intensive. Depending on the configuration, face tanners vary between one and three 400-watt lamps, while the SPi version has 9 x 25 'spaghetti' tubes.

XL Light, 2-m-long tubes, expand the tanning surface to a maximum and ensure a head-to-toe tan without concessions.

X₃ Pearl White with Connecting shield plus, SPi

Optional central air extraction, top

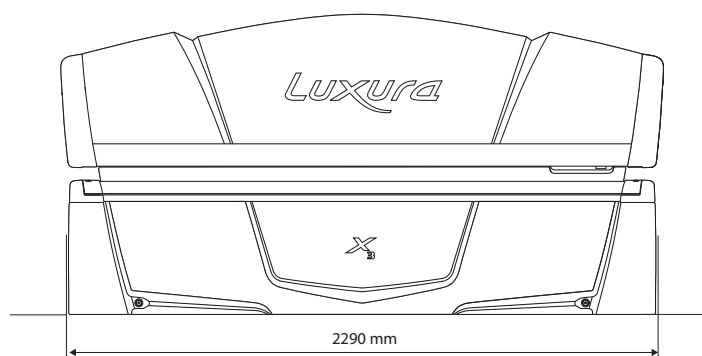

"Easy clean" click-profile bench

The body cooler at the foot end is fitted as standard and ensures a pleasant temperature while tanning

we like ideas

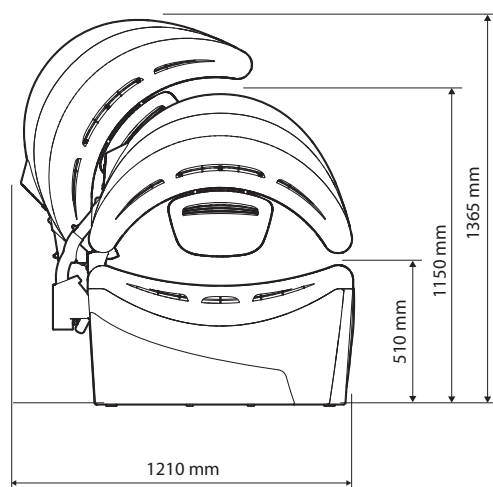

EasyClean click-profile makes maintenance as easy as can be: easy reach of tubes and facial filters - a fast way of cleaning and switching lamps.

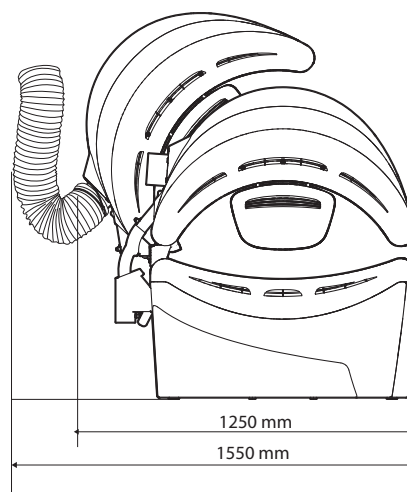

The Luxura X₃ comes with a choice of three different decorative solutions for the connecting space between canopy and bench.

Deco caps
'Deco caps' are fitted as standard.

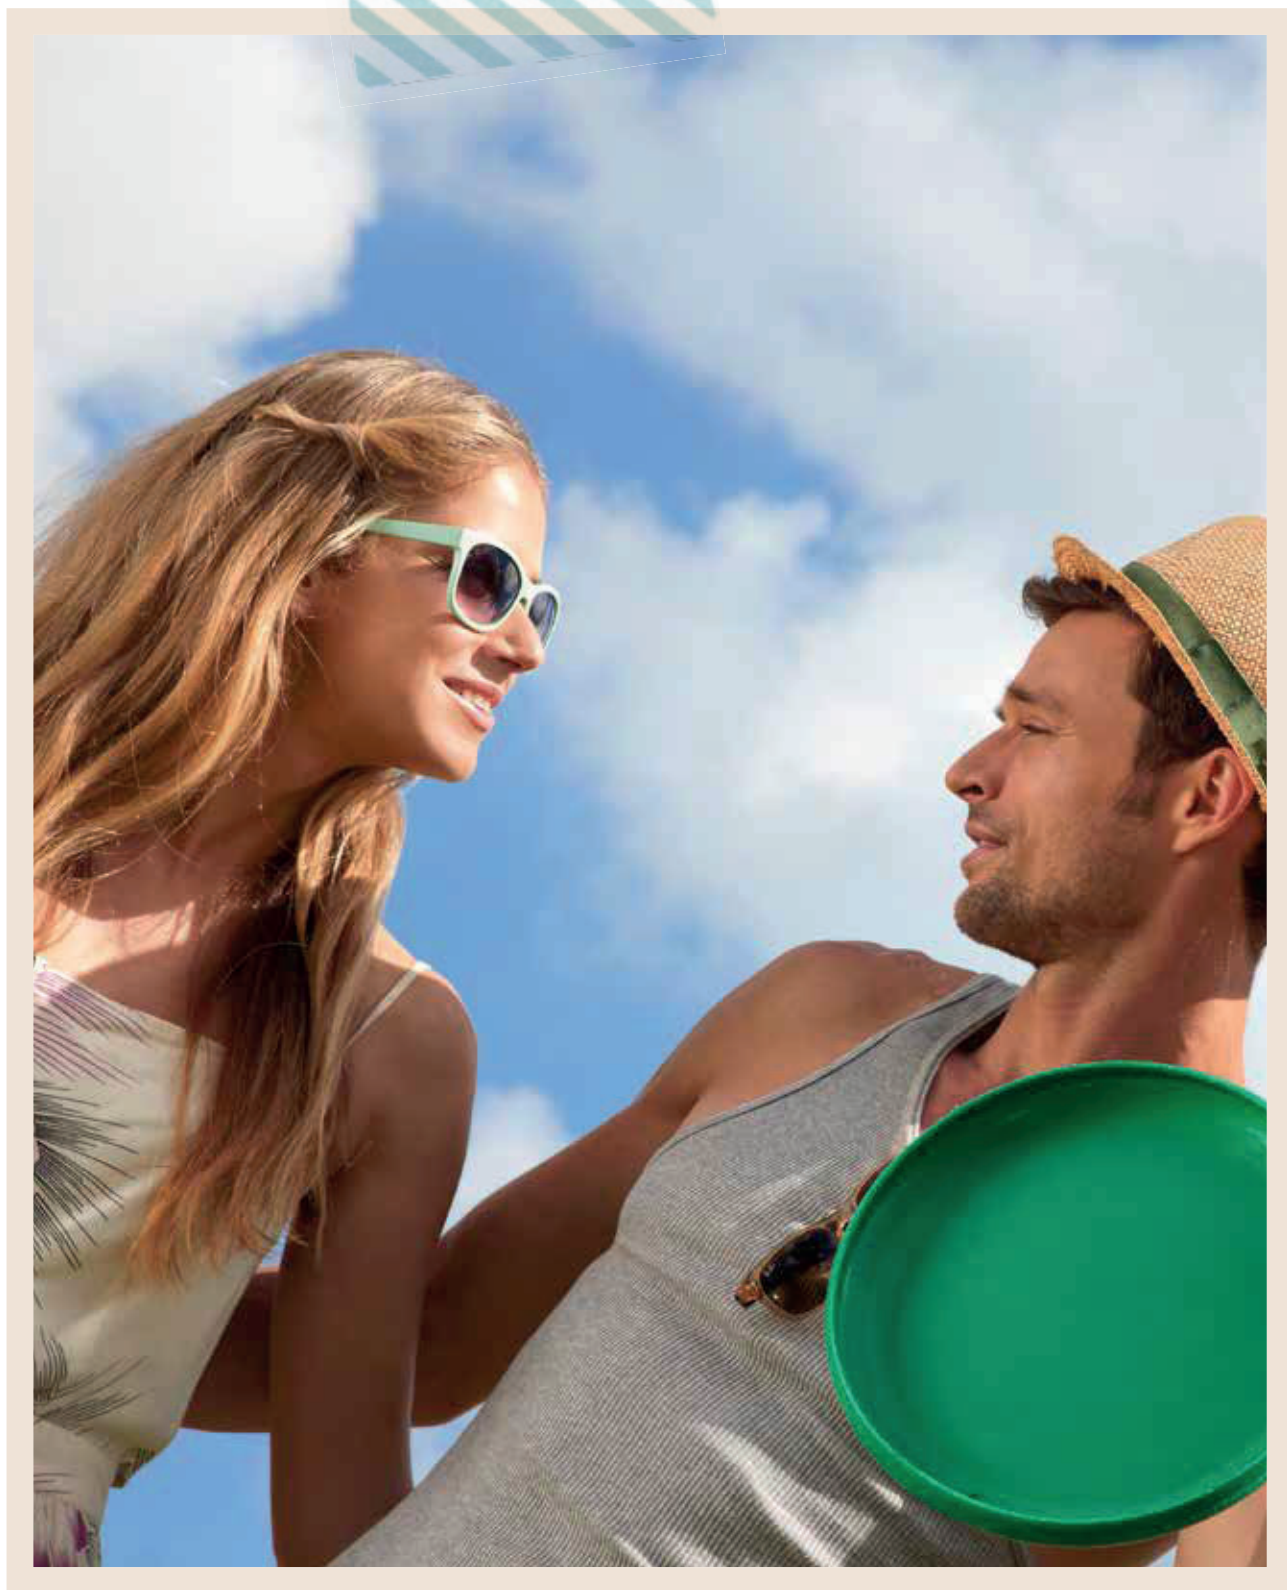

Connecting shield
In the configuration 'Connecting shield' provides a silver screen throughout the whole length of the sunbed for an integrated, unified look.

Connecting shield plus
This version comes with a high quality decorative lighted screen. Ambient FlowLight as well as My MP3 and SoundBox are integrated.

The Luxura air-conditioning system ensures a pleasant temperature as you lie back on the ergonomically shaped reclining surface. A wonderful refreshing breeze – adjustable at different levels – gently touches body and face.

Naturally refreshing. A wonderful, gentle mist is sprayed across the body at intervals.

Wellness tanning for all the senses. Whenever a pleasant atmosphere in the tanning tunnel is desired, Xsens will distribute a wonderful scent throughout the interior of the Luxura. It's like a breath of fresh air in the fragrances Ocean, Blossom or Sandelwood. Choose between Xsens I (one fragrance for your Luxura) and Xsens III (three fragrances).

This Intelligent Power Control System guarantees, during the entire lifecycle of the tubes, an optimal output of 0,3 W/m² in conformance with the EU regulation. IP Control achieves a tube lifecycle of 1500 hours! Energy consumption of the tubes will reduce up to 25%.

The smart Bluetooth system allows tanners to easily connect their own smartphone or small tablet to the sound system for great audio experiences. This way they can instantly play their own music while tanning. No cables needed – simply play & tan.

Sound Around Plus includes My MP3, SmartVoice, Bluetooth, 4 external music channels, 4 loudspeakers, subwoofer and SD cards providing two extra internal music channels (relax music, energetic music or program your own music).

In addition to the four optional music channels from the SoundAround package, the user may plug in his own MP3 player, in order to enjoy his own favourite sounds.

A friendly voice will guide the user acoustically through the different functions. It will describe all possibilities, turning the tanning session into a veritable miniature holiday.

This facial tanner, with a single socket mounting, has a specially developed tanner-reflector combination, which ensures first-class tanning results (for X₁₀ only).

High Power System: a special filter for the SLi facial tanner. For more efficiency, direct pigmentation, and a visual mirror effect.

Balanced Power System: a special filter for the SLi facial tanner. For more efficiency, direct pigmentation, and a visual mirror effect. Especially developed for EU-type III and 0,3.

The XL tubes, which have a length of two metres, ensure an even, all-over tan.

The fading colour flow with a nearly inexhaustible range of colours provides an extra sense of atmosphere.

The electronic ballasts – integrated as standard – ensure energy savings of at least 25% (for X₃ only).

Feel the comfort of the ergonomically formed surface, which follows the body shape.

Sunny certainty

A choice for Luxura sunbeds is a choice for certainty. All the appliances meet the most stringent safety regulations and have the CE quality mark. Moreover, the appliances are carefully developed in accordance with the latest standards for tanning equipment. There's no better way to ensure responsible tanning!
