Luxura features

Luxury , comfort and powerful tanning results

Xsens

Xsens is part of Luxura's lovely wellness features. With Xsens you will enjoy a wonderful scent while tanning; for a complete wellness experience.

Qsens

Qsens is part of Luxura's lovely wellness features and is naturally refreshing. A fine, gentle mist is spread over the face and body at intervals for a sensational cool feeling during the tanning session. This feature is easily turned on and off via the control panel while tanning.

BPS

Balanced Power System: a special filter for the SLi facial tanner. The combination of lamps and the reflective filter glass is specifically designed to achieve the optimal balance between UV-A and UV-B output within the 0.3W/m² standard. In addition, Balanced Power System allows a small amount of infrared light to pass through to extra stimulate the skin and give off a comfortable warmth. The filter has an elegant visual mirror effect and is developed for use within the 0.3W/m² standard.

IPS

Immediate Power System: a special filter for the SLi facial tanner with an optimal result for high immediate pigmentation. The filter has an elegant visual mirror effect and is developed for use within the 0.3W/m² standard.

HPS

High Power System: a special filter for the SLi facial tanner. An intense tanning result is guaranteed with the HPS filter. The filter is developed to transmit the most effective combination of UV-A, UV-B and infrared light. This strong combination ensures an intense tan and immediate results. The filter has an elegant visual mirror effect and is developed for use within the 0.3W/m² standard.

ShoulderTanner extension

The shoulder tanner offers the solution for every challenge, even for those parts of the body that are more difficult to tan. The shoulder tanner, which is integrated in the extension, guarantees the perfect tanning result in the neck and shoulder area.

SoundAround

Pump up the volume with SoundAround! Choose ultimate relaxation during your tanning session with great surround sound music. SoundAround offers four external audio channels and includes Bluetooth, SmartVoice, four speakers, a subwoofer and two pre-programmed SD cards that contain two extra internal music channels with relax, energetic or your own pre-programmed music.

SmartVoice

A friendly voice will guide the user acoustically through the different options and functions of the tanning bed. SmartVoice is available in several languages.

Climate Control

With the Climate Control option you can easily set the desired temperature for a wonderfully comfortable tanning session. This option is easily adjusted during tanning to meet each user's preferred temperature.

SoftClose

The Luxura V8 is equipped with SoftClose doors. An intelligently developed hinge system with integrated dampeners ensures that the doors of the V8 open and close very softly and easily, resulting in a comfortable and pleasant experience.

Luxura features

Luxury , comfort and powerful tanning results

EcoPower

The integrated electronic ballast optimizes the configuration of the lamps and ensures energy savings of up to 25% compared to conventional ballast. This percentage differs per unit.

IP Control

This Intelligent Power Control system guarantees the optimal UV exposure of 0.3 W/m², as prescribed by EU regulations, throughout the entire life-span of the lamps. IP Control extends the lifespan of the lamps and ensures consistently optimum output throughout the entire life cycle.

Furthermore, IP Control makes it possible to control each lamp individually. Lamps which are farther from the body are supplied with more power to compensate for the distance. This ensures that every part of the body receives the same 0.3 W/m² of UV exposure and results in energy savings of up to 25% for operation of the lamps compared to conventional ballast.

MyLuxura portal

The MyLuxura portal allows you to monitor the health of your tanning beds in real-time, providing you with everything you need for optimal, efficient use of your beds. The data is easily accessible within a secure log-in area and it is even possible to directly download any data from the portal. Insights into the lifespan of lamps and acrylic sheets, an indication of when they should be replaced for optimal use, software updates via WiFi and online radio are just a few of the many possibilities that MyLuxura offers.

MyLuxura

Welcome in Luxura's online world

The MyLuxura portal allows you to monitor the health of your tanning beds in real-time, providing you with everything you need for optimal, efficient use of your beds.

Unique & Smart

Intelligent features and functionalities provide you with

- insight into the well-being and maintenance status of your tanning beds, allowing you to deploy your technicians more efficiently.
- the ability to identify errors yourself and the knowledge to find additional information on how to resolve these errors.
- the knowledge to maximize your tanning beds' performances by understanding insights in temperatures and the ideal lamp climate.
- countless other insights, statistics and figures to get a grip on the use and well-being of your tanning beds.

Monitor beds in real-time
Easy control & faster diagnosis
